

## MEMORANDUM

TO: Gary Klepper, Chief, Site Assessment Unit  
Groundwater Quality Unit, MDNR

DATE: 5-17-85

FROM: John L. Hesse, Acting Director *JLH*  
Center for Environmental Health Sciences

SUBJECT: (Albion - Sheridan Landfill) Proposed Funding

*641 Calhoun Co  
307  
corresp-file*

*OK  
G. Hall*  
Information recently obtained from the Calhoun County Health Department is in agreement with information contained in Ron Kooistra's May 6, 1985 memo to Andy Hogarth. There is currently no evidence of any health hazard via the direct contact route.

We, therefore, modify our earlier position by withdrawing our recommendation to fence this site at this time.

MEMORANDUM

TO: John Hesse, Center for Environmental Health Sciences  
Michigan Department of Public Health

FROM: Gary Klepper, Chief, Site Assessment Unit,  
Groundwater Quality Division

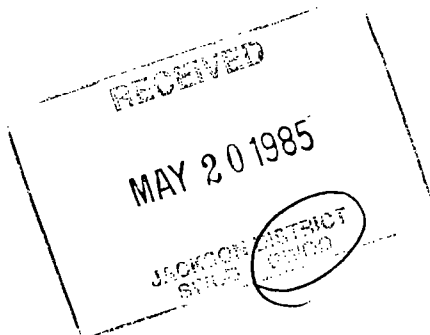

SUBJECT: Albion-Sheridan Landfill Proposed Funding

Attached please find a copy of a funding request change submitted by Ron Kooistra, MDNR, Jackson District Supervisor, for the Albion-Sheridan Landfill in Calhoun County. Please review this request and supporting site inspection observations in light of your Department's recommendations for interim response measures dated February 1, 1984. Based on these recommendations, it was proposed that \$82,500 be set aside for fencing at this landfill.

If your office concurs with Ron's request, not to fence the Albion-Sheridan Landfill, please forward a statement to our office modifying your position. If you have any questions or comments feel free to contact Ron Kooistra at 788-9598 or myself at 373-4800.

Albion-Sheridan L.F.

TO: Andy Hogarth, Chief, Remedial Action Section

FROM: Ron Kooistra, District Supervisor, Jackson District Office

SUBJECT: Albion-Sheridan Landfill

As per our discussions at this district office on 4/29/85, we are submitting this memo as a request for funding change for the above named facility. Gene Hall and I inspected this site in June of 1984. We walked throughout the entire fill area. The final cover on the fill was of available materials (sand and gravel). During our inspection, we saw no evidence of any hazard via direct contact.

Since this site is funded for fencing, we have concluded that this site should not be finced and the funding be applied to another site. If you need any further information, please call me. We would recommend utilizing these funds for the Mosherville oil pit cleanup for which we plan to submit an RFA this fiscal year.
